Product name: PSI-Mix Inline
Disperser

Attributes/comments: Netzsch Fine Particle Technology, LLC features the new PSI-Mix inline disperser, a completely new approach to mixing. PSI-Mix combines innovative pre-wetting dry powder dispersion and the creation of a virtual infinite wetting surface, with an elegantly simple vacuum-to-pressure gradient to deliver a rapid, safe, dust-free, enclosed mixing solution. PSI-Mix technology speeds production of paint, inks, foods, drugs and many other applications to up 1/10th the time needed for traditional mixing methods, and does it using less production floor space and 1/10th the power—improvements that can net hundreds of thousands of dollars in capital equipment savings.
